DESCRIPTION

The RUNPOMETER RM35 is a digital cable length measuring device which can be used to precisely measure cables, single conductors, ropes, pipes or hoses with a diameter of Ø 2 mm to Ø 32 mm. It is splashwater resistant and dust-resistant, extremely shock-resistant and thus ideally suited for the jobsite. The RM35 has 2 totalling buttons which can be used to add up the measured values as you work. A countdown function is also included, which can be used to measure predetermined cable lengths. The RM35 is equipped with a lithium-ion battery that has an extremely long runtime (100 hrs. continuous operation without backlighting). The battery can be charge using the integrated USB-C charging socket. The RUNPOMETER can be easily connected to the X BOARD XB 300 or XB 500 cable unwinding system via the supplied belt and clip system. The belt length can be adjusted from 750 mm to 1200 mm. Alternatively, this belt can also be fixed to the connecting pad, thereby offering a fixation option for all conventional rolling systems.

Calibratable INFO: Should you require a calibrated RUNPOMETER RM35, please contact your sales partner or RUNPOTEC directly to clarify price and delivery time.

The X BOARD XB 300 is a universal professional cable winder/unwinder for all small to medium cable reels (also for damaged cable drums). Loadable up to 300 kg.

DESCRIPTION

The compact X-BOARD - XB300 is a universal professional cable winder/unwinder for all small to medium cable reels.

The XB300 impresses with its small, light and flat design, but can still be loaded up to 300 kg.

Especially suitable for damaged cable drums.

It enables trouble-free and rational working without tangled cables.

6 rubberised feet ensure a non-slip and stable base. Optimal for protecting surfaces for already finished floor coverings.

Due to the removable mandrel, cable drums with different hole sizes can be used.
